Cosmetic Dentistry & Smile Makeovers

Are you happy with the colour of your smile?

When we meet someone new, we are flooded with impressions that determine our response.

One of the most critical features that affects our reaction is that person's smile. We offer several aesthetic treatments to achieve the ideal smile of your dreams. The choice is based on your preferences, tooth condition, facial features and personality.

Teeth Whitening

One-Visit Crowns

Ultra-Thin Porcelain Veneers

Implant Dentistry

Implants and beautiful new teeth—all in one day!

When was the last time you were able to bite into a crisp apple, or dig into a juicy steak comfortably and with confidence? With dental implants, you can enjoy all of your

favourite foods again. Imagine getting completely secure, stable teeth in just one day.

Implants are titanium posts that are permanently anchored to your jaw. Once the implant has integrated with the jawbone, porcelain crowns, bridges or dentures can be attached and the process is done. You will have the confidence and freedom to enjoy any social activity you desire and never have to worry about loose dentures again! Smile with confidence, replace missing teeth and secure loose-fitting dentures.

Free complimentary consultation!

Dr. Arun Narang & Associates

Use it or lose it!

Most insurance plans have a set dollar amount to be paid out by the end of each year. Any unused benefits are lost. If you have any dental treatment that you may have been postponing, please call us as soon as possible. You have very little time left.

Invisible Braces for Adults

The invisible way to straighten teeth

In appropriate cases, Invisalign can be used to straighten teeth without braces. Invisalign gradually moves your teeth through a series of custom-made, removable, nearly invisible Aligners. You can brush and floss normally because the aligners are removable unlike traditional braces.

Why Consider Invisalign?

Because its an option for straightening teeth without braces!

Invisalign aligners are virtually invisible! Your friends won't believe you are wearing them. Chances are they may even book appointments to get their own. **Orthodontic treatment may be completed in 9-12 months.**

Orthodontics without extractions in most cases!

Orthodontics

For adults and children!

We love working with children because dentistry for younger patients is quite different from adult dentistry. Young teeth, jawbones and facial characteristics are in a state of flux and it's important to guide facial growth as children move through their developmental years.

We recommend a **FREE orthodontic consultation**, no later than age 7, to identify facial and developmental problems at an early stage. Early treatment is key to:

- Guide jaw growth
- Lower the risk of trauma to protruded front teeth
- Correct harmful oral habits
- Improve appearance and self-esteem
- Guide permanent teeth into a more favourable position
- Improve the way lips meet

Laser Dentistry

A beautiful smile is your most valuable asset!

Lasers can be used for cavity detection, teeth whitening, gum reshaping, and to harden bonding materials used in fillings. In addition, lasers are used in periodontal care to remove bacteria from periodontal pockets.

Laser Periodontal Therapy is a laser based technique for the non-surgical treatment of periodontal pockets using the Soft Tissue Diode Laser. This procedure aids in reducing the bacteria associated with the disease process which may cause deepening of pockets.

Preventive Dentistry: Tooth decay is one of the main causes of tooth loss in adults and children that can be easily prevented. We use the DIAGNOdent laser for the early detection of tooth decay. Early cavity detection allows you to protect and keep your teeth for a lifetime.

Fissures usually cannot be probed with conventional instruments.

The DIAGNOdent laser penetrates almost 2mm into the fissures and reliably detects pathological changes.

Family Dentistry

Over 25 years of dental experience!

Choosing the right dentist for your family is an important decision. We provide a high standard of professional care, comfortable, quality dentistry for you and your entire family.

Our team of friendly, caring professionals is trained in the latest techniques of virtually "pain-free" care.

Asleep Dentistry

You'll wake up refreshed, with a brand new beautiful smile and little or no memory of the treatment. You can have years of dental treatment done in one or two visits. People with very busy schedules can also get the dental care they need, easily and quickly.
